Linea

Linea is a premium top grain, aniline dyed through upholstery leather, with a rich comfortable feel supported by an extensive colour palette.

The advanced upholstery protection of Linea retains the natural characteristics of a quality leather. Linea has a natural subtle fine grain with a thickness of 0.9 - 1.1mm which is perfect for upholstery applications. Its soft waxy feel coupled with a semi-matt appearance adds to it luxurious personality.

Colour Samples

<h3>Prime</h3>	<p>One of our luxurious leathers, Prime is a top-grain and dyed through leather, between 0.8-1.0mm thick. This leather is specially treated to remove natural marks and create an even texture and colour. With a protective lacquer Prime is made both easy to clean and long-lasting.</p>
<h3>Trend</h3>	<p>One of our most popular leathers, Trend is a luxurious top-grain leather between 0.9-1.1mm thick. A slightly corrected leather, most of Trend's natural marks and defects have been removed, creating a smoother grain structure and soft feel.</p>
<h3>Sauvage</h3>	<p>Sauvage is a natural milled top grain upholstery leather, which demands a very good rawhide selection. This leather is exceptionally soft, with visible natural marks. A combination of two-tone and shiny patina effects provides depth, life and elegance, guarantying a unique deep and rich look. The look and feel improves with the age and the thickness of approx. 1 mm makes it ideal leather for upholstery. Sauvage breathes well and responds easily to body temperatures. Due to the nature of this leather, and the two-tone application, some color variations is likely to occur within one hide and between hides. Considering It is a naturally milled leather some grain structure variation also can be expected.</p>
